Introduction

Proverbs, adages, and pithy statements from around the world are familiar to us. Saying so much in a nutshell is an art the Greeks have tried to perfect all through their life. "To give a sea of matter in a drop of language" was regarded as the perfection of oratory. I do not claim to be one among them but I have a mite to contribute for the edification of the Body of Christ. These power points are statements of truth in short sentences. They have a standard – The Holy Bible. Word-play is used to lend interest and aid memory.

Just as a spark is enough to light a fire or to set ablaze a forest, these statements are also meant to spark the spiritual fires of our soul. It is my sincere prayer that the Lord would use these power points of life to point us to the truth that can set us free. They are easy to remember and reflect upon. These are some principles that I have learnt during my meditation and used them in my preaching and writing over the years. My life has been transformed and challenged by the truths the Lord has revealed by His grace.

Please read them slowly and ponder upon each statement to derive its full meaning and digest it in your spirit to be blessed. May the God who is the source of all truth be praised and receive all glory forever and ever.
